

Steve Beeler

Director
Production Modeling Corporation (PMC)

Steve Beeler is a Director at Production Modeling Corporation (PMC), a full-service operations engineering and management consulting firm based in Dearborn, Michigan. Steve's Special Situation's practice targets private equity firms, middle-market manufacturing and service companies, and emerging technology start ups. Responsibilities include business development, client relationship management, and project management.

Steve came to PMC from the Ford Motor Company. During his twenty years at Ford, Steve guided North American assembly and stamping plants through the ISO 9001 registration process, launched two vehicles (Explorer and Windstar), and integrated computer-based simulations into new model manufacturing planning processes. Steve assembled a cross-functional / multi-national team to model the South American order-to-delivery process. The "skunk works" project identified policy and physical constraints and freed up capacity to be allocated more profitably based on margins, exchange rates, shipping costs, tariffs, etc.

Steve holds a BSME from Massachusetts Institute of Technology, an MBA from Indiana University, and is a Professional Engineer. Steve is a member of the Society of Automotive Engineers, the Turnaround Management Association, the Association for Corporate Growth, and the Michigan Venture Capital Association
